BUSINESS: NEW STAFF ANNOUNCEMENT / PEOPLE IN THE NEWS

VANCOUVER, WASHINGTON – Roggenkamp Erickson and Associates, P.C. (REA) continues to add new staff to support their growing structural engineering design practice:

Shawn Stevenson, PE is a registered engineer who is skilled in timber and masonry engineering design on older building retrofits and remodels, as well as the latest concrete and steel structural systems. He is currently working on a seismic upgrade of the Church of Jesus Christ of Latter-day Saints meetinghouse in Astoria, Oregon, a retail expansion for Michael's Craft Store in Boise, Idaho, and ongoing involvement in the firm's building forensics evaluations for litigation support.

Scott Howard is well-versed in the structural engineering design of renovation and seismic upgrade services, having assisted in a variety of Federal Emergency Management Agency (FEMA) studies including ASCE 31 and FEMA 356. He is currently working on the Gateway Community Church Addition and Renovation in Washougal, Washington, a seismic upgrade of the Church of Jesus Christ of Latter-day Saints meetinghouse in Milwaukie, Oregon and the Beaverton Bike Gallery's expansion and remodel.

Sherry Erickson, PE worked as a consulting mechanical engineer for years before seeking her MBA. As REA's Business Manager, she is responsible for all accounting, bookkeeping and financial reporting functions, which she proficiently tailors to the specific needs of REA.

Christine Dick provides a broad range of in-house administrative support as well as customer service skills to REA's clients. She has a balanced understanding of the operational and financial aspects of business, and actively supports the firm's principals and other staff in their day-to-day projects.
